

The 91 Legend STARTUP

**PLEASE GIVE US A CHANCE, AND
YOU WILL SEE WHAT KIDS CAN DO!**

Executive Summary

91 Legend StartUp

The 91 Legend StartUp started from us noticing that many artists have a lot of potential in the metaverse but do not have a place to show off their hard work. That is where we can help.

The 91 Legend StartUp proposes a win-win situation for landowners and NFT artists.

WE ARE MORE THAN HAPPY TO PITCH FOR YOU IF YOU HAVE ANY QUESTIONS.

Problems

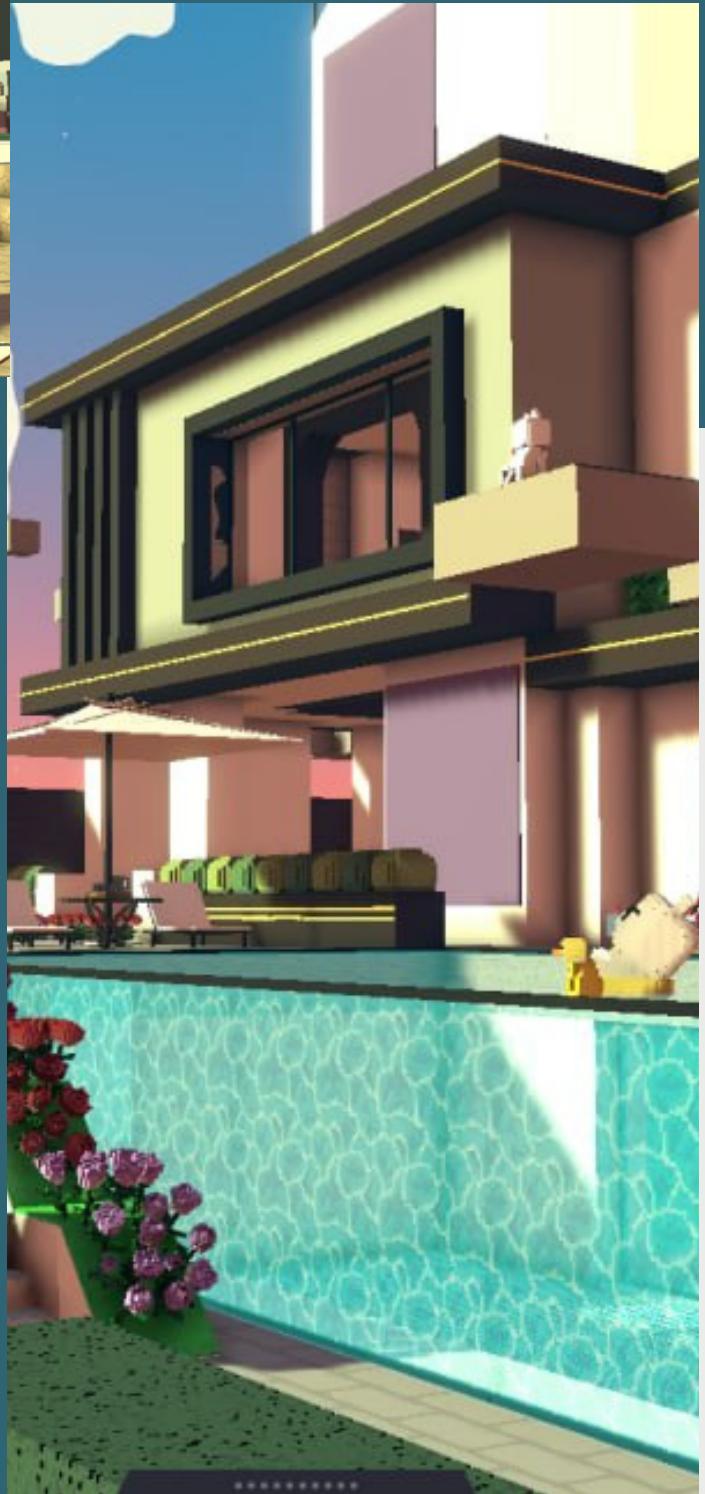

Landowners:

- owns LAND but doesn't know what to do with it
- wants to promote the LAND
- wants to monetize the LAND

NFT artists:

- wants to promote his/her artwork
- has no LAND
- no skill in building a gallery

PLEASE GIVE US A CHANCE, AND YOU WILL SEE WHAT KIDS CAN DO!

Solutions

Landowners:

- To make use of the LAND
-
- The NFT artists will promote the LAND by using social media.
-
- To get monetized by advertising

NFT artists:

- Having a place to display their NFTs
-
- Doesn't have to own or rent any LAND
-
- Doesn't need skills to build a gallery

Project Overview

We also have 3 seasons for each year, and each season will last four months. Every new season we will accept new NFTs and make a new experience that will help the gallery to become consistent. After each season, the NFT gallery experience will be given away to a lucky participant in that season.

Project Agreement

Artists will be selected each season, following a first-come, first-serve basis.

At least ONCE a WEEK, the artists have to tweet their NFT displayed on our gallery.

Why "91"

We will have 91 NFTs placeholders in total.

- 72 spots for the public
- 9 spots for the owner (moderator owns NFT)
- And 10 spots for sponsor or moderator choice

zone

There are 9 zones : 10 NFT per zone : 8 for public, 1 for moderator and big one for sponsor.

The rest of the NFTs will be for the public, and all you have to do to display your NFT is to promote 91 Legend StartUp and your NFT on social media.

The big one: One of them will be the main attraction, and it will be the biggest one of them. This spot belongs to our sponsor or our moderator's choice.

PLEASE GIVE US A CHANCE, AND YOU WILL SEE WHAT KIDS CAN DO!

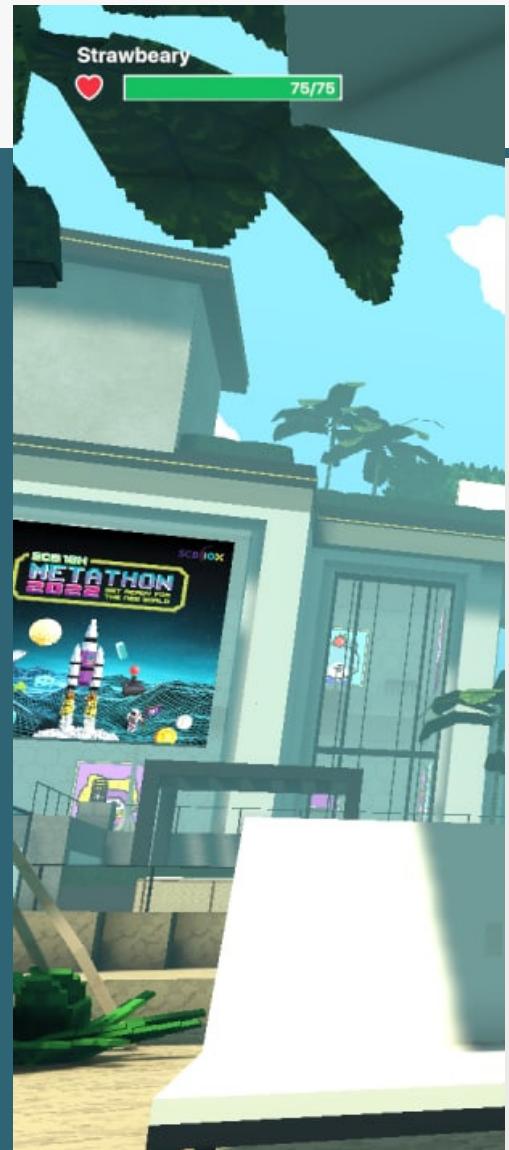

Fun Mini-Games

ZONE 1

This zone has a bunch of chests, but there is only one that will give you the code.

Test your luck and see if you get the code from the chest on your first try! There is a hint on which chest contains the code.

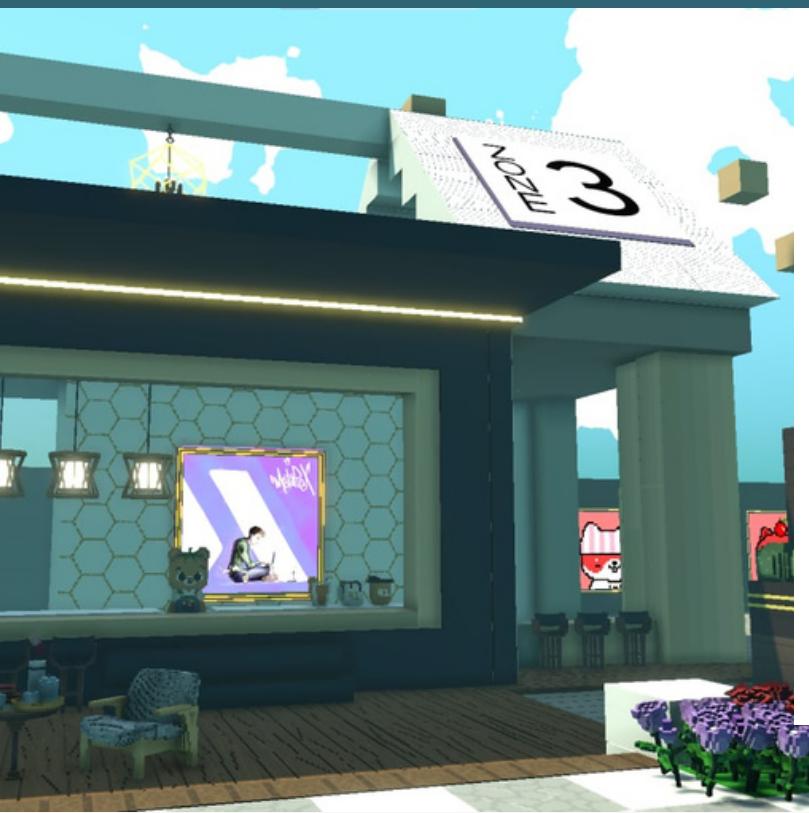

ZONE 2

What's that weird hole in the wall?
Oh, there is a beaver?! It looks like I
need a ladder to get up there.

That's right, in zone 2, you need to
find a ladder to receive the code from
our wise old beaver in the wall.

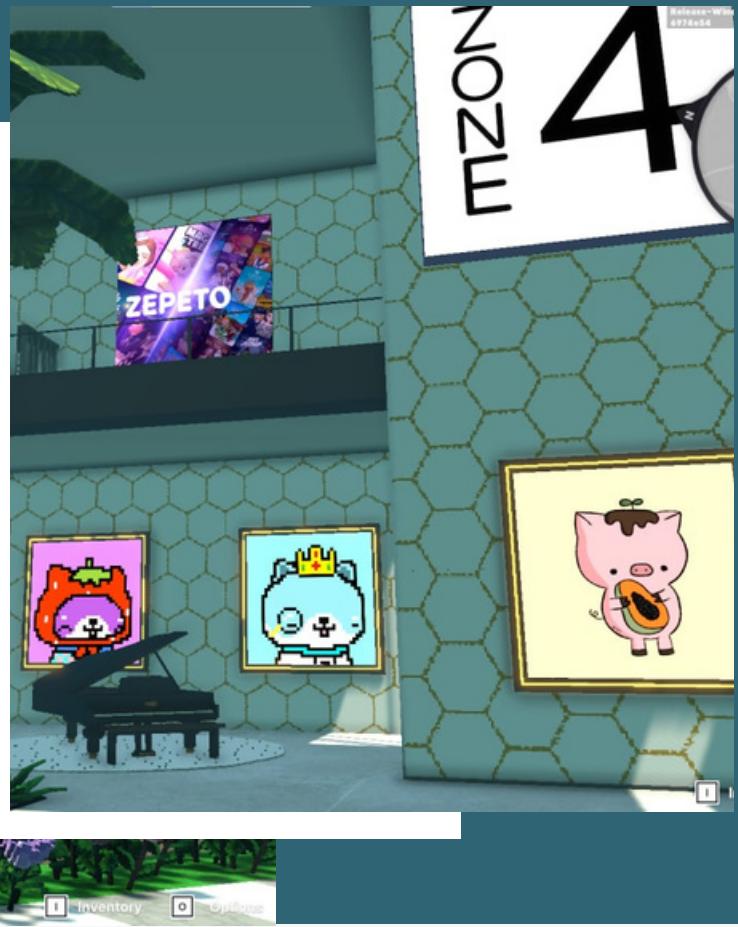

**WE ARE MORE THAN HAPPY
TO PITCH FOR YOU IF YOU
HAVE ANY QUESTIONS.**

ZONE 3

Zone 3 is a combination of a cafe and parkour. Once you order your coffee, hot chocolate, or juice, you can try out the parkour on top of the cafe!

If you manage to complete the parkour, you will receive the code from the parkour cat!

ZONE 4

In zone four, we have two floors, both of which are full of beautiful NFTs, but there's a twist.
audible gasp

A poor cat stuck in a rusty cage on the second floor! Quick! Find the key to set the cat free! Who knows, maybe the cat will reward you with a code.

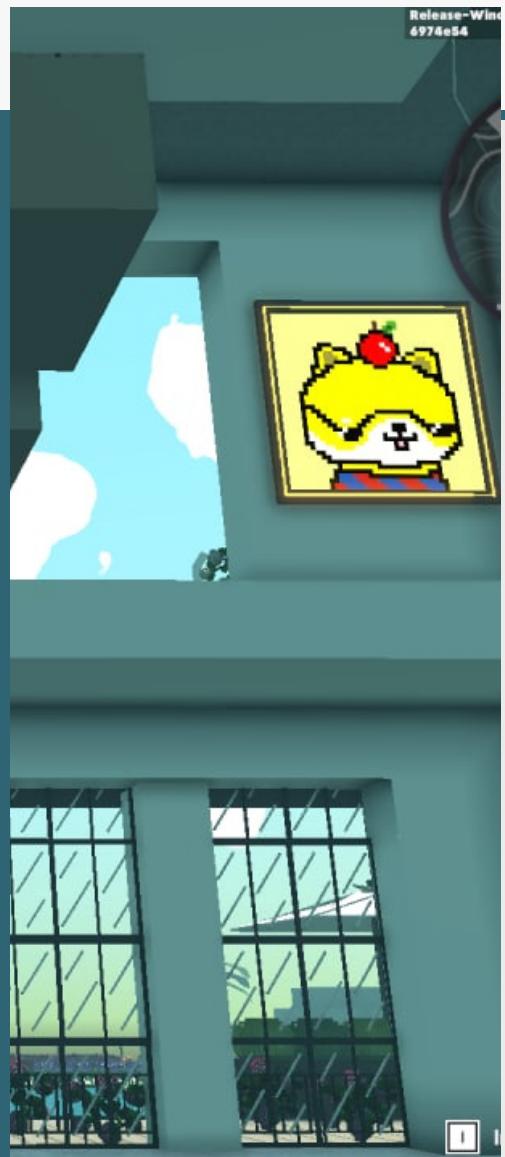

Fun Mini-Games

ZONE 5

Who was responsible for this!? There is a missing glass panel, but something tells me there is a spare part to fix it.

Try riding the elevator down to the first floor and look around for the missing piece of glass. If you're quick, you might get rewarded with the code.

ZONE 6

Oh, what is this? The parkour cat strikes again! Try completing this parkour the infamous parkour cat set out for you! While jumping, you can observe the beautiful NFTs around you. I've also heard that you will be rewarded with the code if you make it to the end!

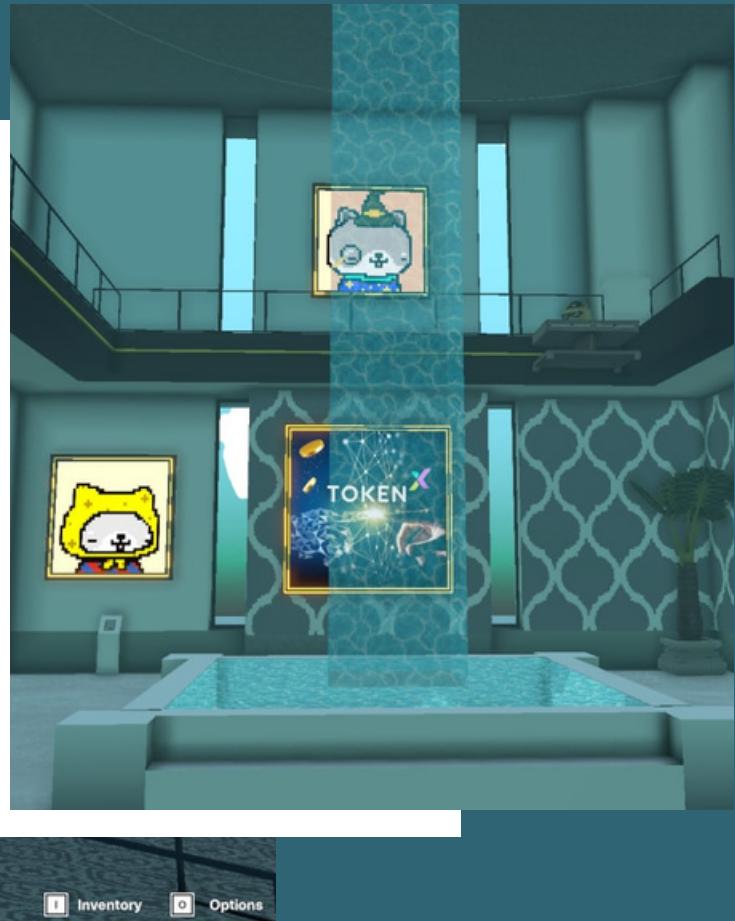

**PLEASE GIVE US A CHANCE,
AND YOU WILL SEE WHAT
KIDS CAN DO!**

ZONE 7

Zone 7 is the first zone that requires you to activate your brain! There are three levers, and you need to flip them until it's correct.

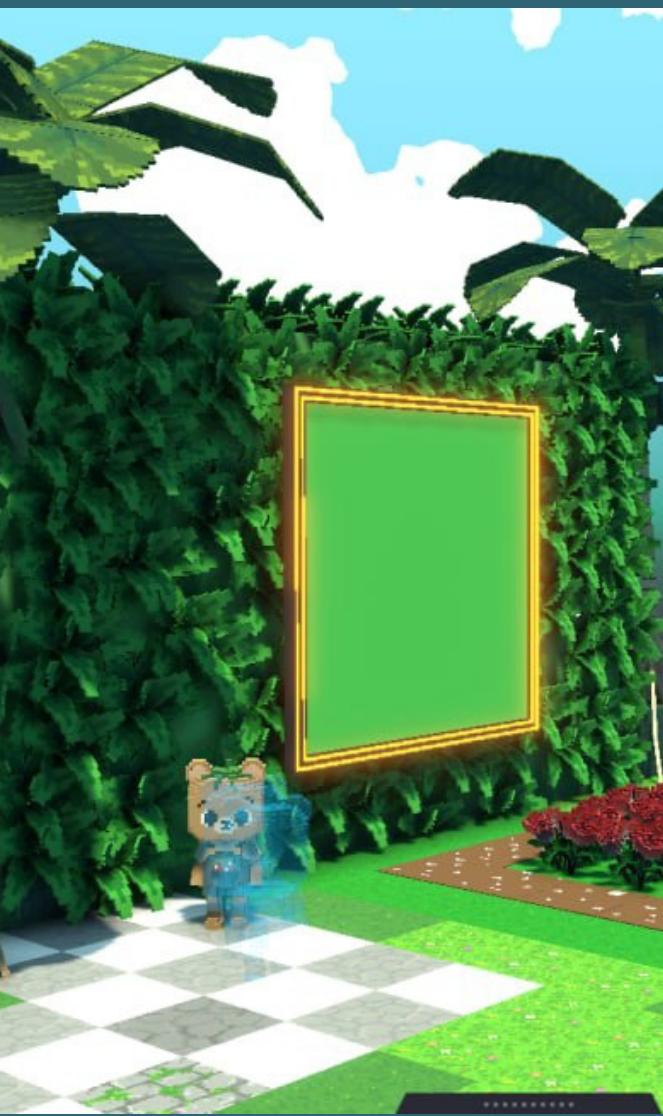

But keep in mind there is only one right combination! If you need guidance, go over to the cat in the corner.

ZONE 8

Zone 8 holds a special place in my heart because it reminds me of 1st grade. We have to count how many NFTs are displayed here and then subtract the sponsor NFT(s) in this zone.

Then you have to go to Coding For Kids and tell him how many NFTs there are, not including the sponsor, and since he is kind, generous, and loving, he will give you the code in return.

ZONE 9

We made this zone for all the farmers in the metaverse! No one has been up here to the garden for many years now, and the dirt is clogging the stream! Quick!

Please help us out by digging up the dirt to let flowers grow again! We are willing to trade your work for the code!

Why INNOVATIVE !

91 Legend StartUp isn't just an ordinary NFT Gallery. Instead, it's an NFT Gallery in the Metaverse. This way, both artists and visitors can have a metaverse experience.

Not only that, but our gallery also isn't just a boring NFT Gallery where you just walk around admiring the NFTS. We have 9 fun mini-games that you can play to get a prize.

This prize is that you have a chance to win an adorable cat NFT which will follow you around and interact with you the next time you visit our gallery. In addition, we also are giving away the entire gallery experience to the NFT artists that display their work in our gallery.

Future Plan

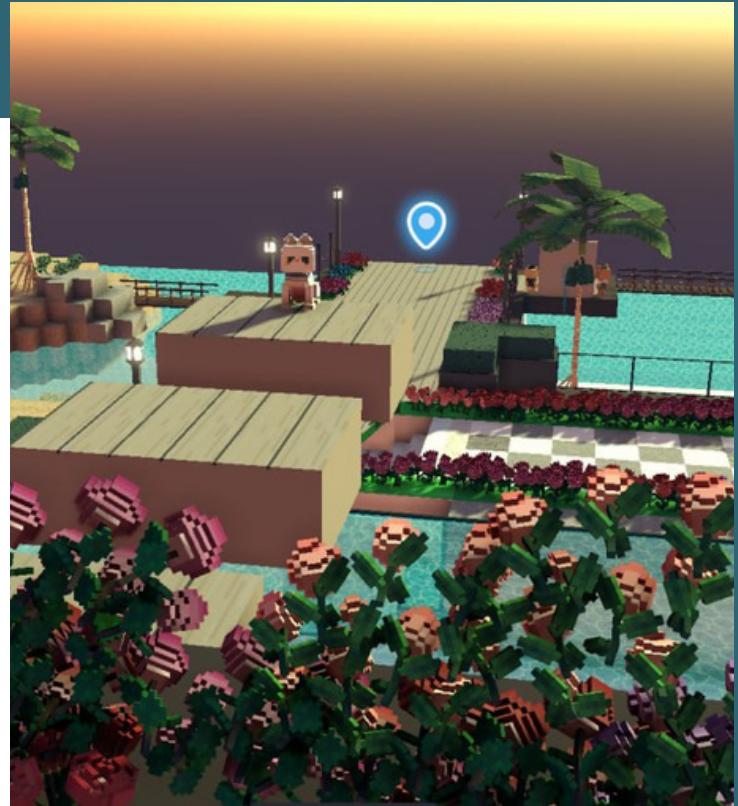

Our gallery theme design will be changed every season (space, forest, fun park, etc.)

CAT NFTs given away to visitors will be their companionship whenever the owners revisit our gallery. (They can play and feed with their CAT NFTs.)

What We Do ?

WE ARE MORE THAN
HAPPY TO PITCH FOR
YOU IF YOU HAVE ANY
QUESTIONS.

In the past, our team has had a lot of experience in building and programming in the metaverse. We have built Modern Villas, Castles, NFT Galleries, Fantasy Land, Rapunzel's Tower, Game Jams, multiple animated Vox Edit assets, made the NFT Collection "Fruity FLuffy" (Now Selling on OpenSea) and much more.

We also have a lot of experience coding in python. In our past projects, we have learned many different ways that we can improve, and each time we start a new project it keeps getting better. In 91 Legend StartUp, we will combine all of the tricks we learned and design the best experience we have ever made.

Our Team

Gemmy Somboontham
Gameplay Engineer

EXPERIENCES

- Certified from Sandbox Bootcamp
- Codes and programs in Python and The Sandbox

CodingForKids

Affy Somboontham
Metaverse Architect

EXPERIENCES

- Certified from Sandbox Bootcamp
- Creates buildings and animated assets in The Sandbox, makes NFTs and has experience in Sketch Up.
